DETAILED ACTION

1. Amendment filed on 11/03/2005 has been entered.
2. Claims 1-24 are presented for examination.

Information Disclosure Statement

3. This office acknowledges receipt of the following items from the Applicant:
Information Disclosure Statement (IDS) filed on 11/03/2005.
4. Information disclosed and list on PTO 1449 was considered.

Reasons for Allowance

5. Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-24 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Perner et al. (U.S. Patent No. 6,834,017), and others, does not teach the claimed invention having an apparatus for improving stability of magnetoresistive random access memory device over process and operational variations comprising a variable analog control circuitry connected to receive the reference current control signal from the current reference circuit, wherein the variable analog control circuitry generates a word current reference signal in response to the reference current control signal and generating a source current reference signal in response to the reference current control signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
